

# 125MM PURLIN SCREW

Designed for faster starts, and less torque while driving.

## USAGE

Designed to provide an easy-to-install, high-strength alternative to Purlin Clips, Hurricane Clips and traditional wire connections. The MiTek 125mm Purlin Screw is ideal for the contractor and do-it-yourself enthusiast alike.

### → KEY FEATURES

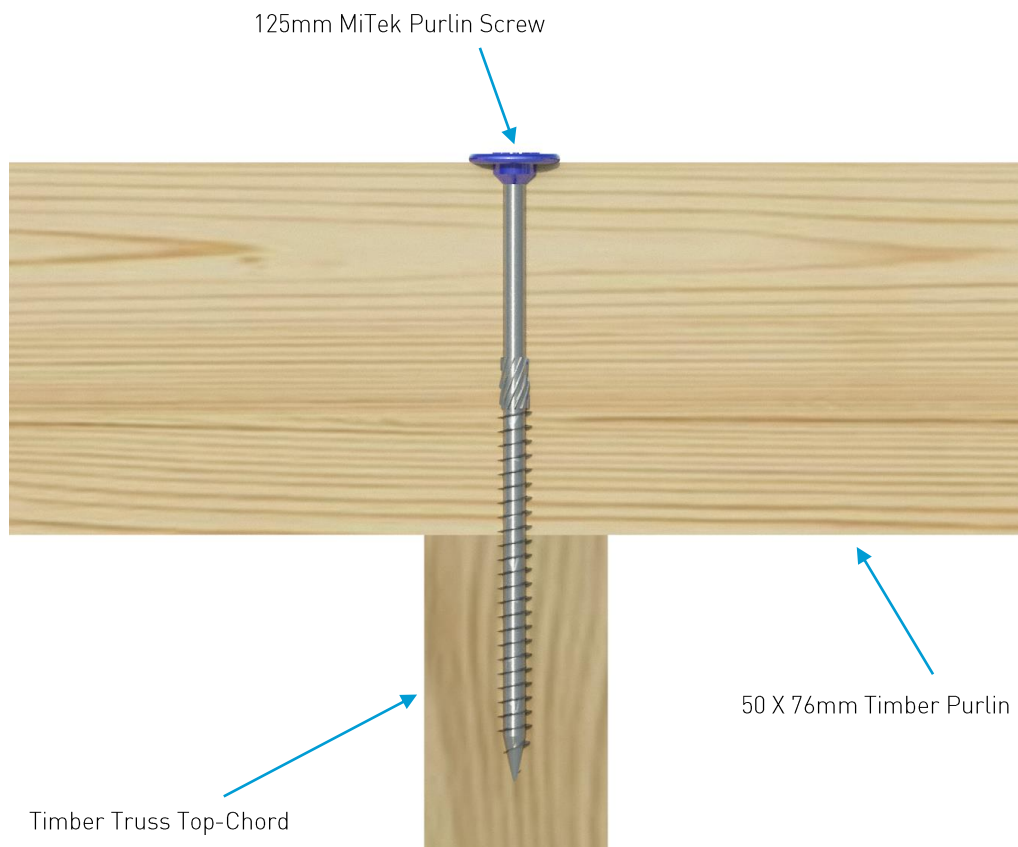

- Electro-Galvanized (minimum 5 micron) coating provides corrosion resistance
- Thread design provides superior holding power
- Type 17 Point for faster starts and easier driving
- Reduced torque and no predrilling required
- Allen / Hex bit compatible
- Allows for Underlay not to be broken

### → APPLICATIONS

- For engineered wood connections, between 50mm x 76mm timber purlins and timber roof trusses.
